(54) Title: SYSTEM AND METHOD FOR GIVING A PRESENTATION

(57) Abstract: The invention relates to a method of giving a presentation on a wireless projector (1) from a mobile device (3). If the mobile device (3) has access to a company's internal network (6), a wireless communications connection is made to the projector (1) over this network (6), thus enabling access to be gained to the data present there. If on the other hand the mobile device (3) belongs to a visitor who does not have access to the network (6), only an ad-hoc connection is made between the device (3) and the projector (1) without the network (6) being involved.
